#### John Manning

CEO & Service Line Leader

John is recognized across the industry for his detailed analytical abilities. He is frequently called an expert witness to testify in state and federal court. John is the author of Prevent and Turnaround the Troubled Construction Project – A Guide for Owner Developers. His understanding of project feasibility analysis, value engineering, appraisal, budgeting, and project management has led to his selection and experience as a project manager on large-scale projects globally.

### Background

As a category four hurricane, Charley was one of the strongest hurricanes to strike the U.S. and, in particular, Florida. Experts estimate the storm resulted in billions of dollars of damage. Unfortunately, Daytona Beach, Florida, sustained severe damages. Hurricane Charley was just the first of four hurricanes to strike the area within a six-week time frame.

KMI provided hurricane damage assessment services to 13 hotels along the Daytona Beach waterfront. We also rendered estimating services, insurance claim analyses, litigation support, and managed the recovery construction of the hotels. Over 10,000 sheets of detailed estimated and general damage assessments were compiled for insurance claims. KMI also provided expert testimony in civil cases brought forth in associated filings.
